EquipmentFocusTM Maintenance Management Software

Transit operations are vast and complex. From the areas of the operation that customers see, such as the buses, para-transit vehicles and bus stops to critical behind-the-scenes components, such as the maintenance facilities; there can be thousands of large and small assets to oversee and maintain. Just as FleetFocus manages all aspects of buses and vehicles, EquipmentFocus is a critical tool for managing transit infrastructure and stationary assets.

EquipmentFocus is a comprehensive, browser-based enterprise asset maintenance management solution capable of tracking an unlimited number of equipment units and supporting an unlimited number of workstations from any number of locations. EquipmentFocus tracks all functions related to the maintenance of transit infrastructure, including stops and stations, offices, maintenance facilities, revenue equipment, communications gear, stationary equipment and/or I.T. assets.

- Increase equipment availability and production rates
- Reduce the total cost of ownership (or usage) and transaction process costs through improved warranty claims processing and asset disposition
- Reduce or eliminate unnecessary maintenance procedures based on equipment histories
- Improve process efficiencies for parts and inventory orders
- Reduce spare parts obsolescence, maintenance overtime and improve quality
- Improve equipment data capture which provides better performance data for later analysis
- Expedite parts and service order requisition for quicker repair and servicing
- Improve planned/predictive maintenance for optimal resource allocation
- Integrate with enterprise financials for consolidated reporting on assets, expenditures and operations activities

**EquipmentFocus is a total solution
to maintain your infrastructure.**

EquipmentFocus has Powerful Features

- Complete asset life-cycle management, including budgeting, acquisition, capital improvement, campaigns, and disposal management
- Robust work order functionality
- Scheduling and Calendar functionality
- Complete warranty management
- Flexible preventive maintenance scheduling
