

We Work to Keep
Your Fleet Running.

AssetWORKS

Benefits You Can Count On

- Vehicle Specification and Procurement
- Shop Management
- Equipment Management
- Materials Management
- Labor Management
- Warranty Administration
- Financial Administration

Communication & Reporting

- **Remote Processing with AutoInput™** — AutoInput is a bar-coding and remote processing solution for FleetFocus applications that automates a number of system functions, including parts inventory management, labor capture, employee time and attendance, mobile work order processing, and equipment condition reporting.
- **Inform, Analyze and Plan: Report Generation Utilities** — All FleetFocus applications include a wide variety of standard reports. For all reports, users can define sort, selection, inclusion/exclusion, and range criteria. Reports can also be configured to run at specific times or at regularly scheduled intervals. FleetFocus applications also support ad hoc and custom report generation using Business Objects® Crystal Reports™.

FleetFocus™ Maintenance Control and Management System

For many organizations, vehicle equipment assets and the labor needed to maintain them represent significant and increasing expenditures. To succeed, fleet managers need effective tools to help proactively manage these costs and improve their long-term planning. A fleet enterprise asset and maintenance management software solution can be instrumental in improving a fleet's operations and performance through increased equipment/asset availability, decreased maintenance and repair (M&R) costs, and increased vehicle utilization. The right software system can also provide better data, in less time, to aid in making decisions that will have positive long-term effects for the organization.

Time-tested and proven reliable, FleetFocus™ MCMS remains the leading choice among fleet organizations who rely upon IBM® mainframe hardware platforms. With an installed base of thousands of locations across North America, FleetFocus™ MCMS focuses on three primary cost centers: Equipment and Maintenance Costs, Personnel Performance, and Materials Usage. Since 1983, FleetFocus™ MCMS has provided fleet managers with greater insight into their day-to-day operations, as well as better analytical capabilities for strategic planning, personnel evaluation, program performance analysis, benchmarking, and outsourcing analysis.
