

We Work for
Public Transportation.

AssetWORKS

A TRAPEZE GROUP COMPANY

Benefits You Can Count On

- Increase equipment availability
- Reduce fleet costs
- Extend the useful life of vehicles
- Increase warranty recovery
- Optimize inventory levels
- Improve labor productivity
- Enhance customer satisfaction
- Ensure regulatory compliance for vehicle management, maintenance and parts inventory management

designed by fleet managers for fleet managers with robust features and an easy-to-use interface. FleetFocus™ is capable of tracking an unlimited number of vehicle equipment units and supports an unlimited number of workstations from any number of locations. FleetFocus™ tracks all functions related to vehicle maintenance, including repair and preventive maintenance (PM) work orders; operating expenses including fuel, oil, and parts; and vehicle availability.

FleetFocus™ Maintenance Management Software

For many transit organizations, vehicle equipment assets and the labor needed to maintain them represent significant and increasing expenditures. To succeed, fleet managers need effective tools to proactively manage these costs and improve their long-term planning. An integrated fleet enterprise asset and maintenance management software solution can be instrumental in improving a bus operations' performance through increased equipment/asset availability, decreased maintenance and repair (M&R) costs, and increased bus utilization. The right maintenance management software solutions can also provide better data, in less time, to aid in making decisions that will have positive long-term benefits for the organization.

FleetFocus™ is a comprehensive bus maintenance management system that aims to address the challenges faced by public transit fleets. It was
