

We Work for
Rail Rolling Stock.

AssetWORKS
A TRAPEZE GROUP COMPANY

RailFocus™ Maintenance Management Software

RailFocus™ is a fully integrated solution that manages rolling stock throughout their life cycles, from pre-acquisition to post-disposition. With robust and comprehensive functionality, RailFocus™ ensures equipment reliability, regulatory compliance, and cost containment.

RailFocus™ was specifically designed to meet the needs of rail rolling stock maintenance management in public transportation and features:

- Best practice workflows
- Mobile computing solutions
- Management reporting
- Integration to ERP systems, parts catalogs, and fuel systems
- Fully integrated with AssetWorks FleetFocus™, LinearFocus™ and EquipmentFocus™
- Data center hosting available

Unsurpassed Industry Expertise

AssetWorks' leadership in rail rolling stock asset management software design and implementation is unsurpassed. With more than 450 satisfied customers, including over 80 public transportation agencies, AssetWorks has the largest base of fleet and commuter rail rolling stock maintenance management software customers in North America. For over two decades, the AssetWorks team has strived to provide functionally and technologically relevant public transportation asset management solutions to North America's leading transit and commuter rail agencies.

Benefits You Can Count On

- **Improved Service** – Improves equipment availability, reliability, and safety by reducing in-service failures and comebacks
- **Cost Containment** – Extends the useful life of rail assets, identifies all available warranty claims (including component warranties), optimizes inventory levels, and improves employee labor productivity
- **Regulatory Compliance** – Ensures compliance with FTA and FRA requirements for preventive maintenance from first occurrence through repair completion

Support for Rail-Specific Business Process

- **Rail Operations Management** – Incident management, trip management, crew management, and availability/pull-out management
- **Consist Management** – Consist-level management, including married pairs for preventive maintenance, repairs, inspections, and trips
- **Full Integration with AssetWorks' LinearFocus™** – Full maintenance management support for linear assets, such as track, signals, catenary, third rail, and track structures

**RailFocus™ is a total solution
for asset and maintenance
management of rail rolling stock.**

Rolling Stock Management Functionality

- Comprehensive asset tracking
- Consist management
- Work order management
- Preventive maintenance, repair, and inspection work orders
- Warranty management
- Integrated materials management and purchasing management
- Serialized component tracking
