Intelligence for Everyone with AiM™ IQ

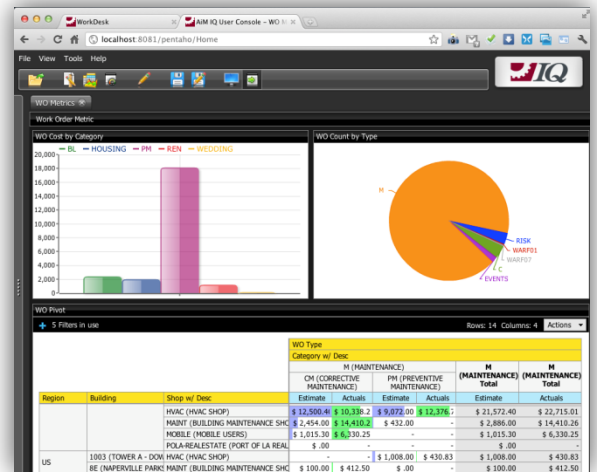

See Past the Data. It's virtually impossible for you to organize and interpret the volumes of facilities and real estate data that your organization collects and stores every day. But what if you could see past the data to leverage timely, accurate and actionable business information hidden just beneath the surface? What if data could be transformed into useful information your organization can use to identify strategic deficiencies, improve operational efficiency, reduce costs and drive positive business outcomes?

Get the "Big Picture" View. AiM IQ from AssetWorks provides a simplified and unified view of what your facilities and real estate data may be signaling. With AiM IQ, you can proactively drive the right business decisions, eliminate information silos, and share key performance indicators across all levels of your organization—from executives to front-line tradespeople. AiM IQ is a sophisticated solution that gives your organization a real competitive advantage by providing a "big picture" view of important performance metrics.

Real Advantages. AiM IQ delivers immediate results for you organization:

- Improve transparency across the organization through greater access to shared data
- Enhance organizational agility and optimize resource utilization
- Quickly pinpoint areas of inefficiency and improve response to customer demand
- Respond more effectively to organizationally- and market-driven change
- Improve operations and reduce costs
- Accurately forecast operational trends

Ease-of-Use. AiM IQ provides a dynamic dashboard that allows you to create lightweight reports, perform dynamic data analysis, and seamlessly leverage external data sources so your

organization has real-time access to meaningful business intelligence. No report-writing or script-writing experience is necessary. Just drag, drop and report.

Product Features. AiM IQ features an impressive array of capabilities:

- **Dashboard-accessible Data**
