

AssetWorks Asset Management Software

AssetWorks Asset Management Software conforms to the unique needs of today's property manager. Our applications are built to a "Best Practices" standard, but on an architecture that can be customized quickly and affordably. You can incorporate your policies, procedures and unique data elements right into the software. Whether you're supplementing an existing system or creating a comprehensive, integrated solution, our modular approach lets you include what you need to get the job done. This means you now work smarter, maximizing efficiency and quality of information.

ASSETWORKS ASSET MANAGEMENT SOFTWARE

- ▶ **TRANSFER MANAGEMENT**
- ▶ **CHANGE REQUEST MANAGEMENT**
- ▶ **DEPRECIATION**
- ▶ **ASSET MAINTENANCE & CALIBRATION**
- ▶ **BAR CODE INVENTORY**

AssetWorks Asset Management Software will optimize your processes enabling you to get the most from your resources and track information like never before.

- Customize your system for maximum efficiency
- Manage property from acquisition through disposal
- Integrate key data and business processes
- Automate the processing of your day-to-day tasks
- Comply with GASB 34/35 reporting requirements

Product Highlights

COMPLETE CUSTOMIZABILITY

Built-in utilities allow configuration of field names, organization hierarchy, screen layout, reporting and more.

AUTOMATED TRANSFERS

Automate your transfer process and use email notification instead of paper forms.

SECURITY PROFILES

User-definable security profiles and location-sensitive access levels means you define who can view and modify assets.

DEPRECIATION YOUR WAY

Multiple depreciation methods and customizable options allow you to modify how the system depreciates assets.

HISTORICAL RECORDS FOR...

Every change you make, as well as lease, warranty, maintenance, repair and inventory tracking.

ATTACHMENTS

Attach pictures, manuals, police reports and other important documents to the asset detail.

OPTIONAL MODULES

Transfer Management

A well planned transfer process plays a key role in effective property management. Complete with email notification, flexible approval routing, and system-monitored timers, AssetWorks Transfer Management Module completely automates the transfer process. You can even incorporate your business rules into the software to enforce compliance, increase efficiency, and eliminate errors and delays.

Change Request Management

AssetWorks Change Management focuses on maintaining central control while maximizing the efficiency of your asset management system. The approval process integrates human judgment into a completely automated process.

- Enforce accountability with detailed audit trails
- Ensure high quality data by monitoring changes to controlled data elements
- Integrate existing policy into the Change Request process

Depreciation

Organizational structure, historical data, and reporting needs often make conversion to an alternative depreciation tool challenging. AssetWorks Depreciation Module is flexible, so it can be tailored to meet the specific needs of any organization. Use it to configure and maintain an unlimited number of depreciation methods, and modify the system so it works for your unique needs.

Asset Maintenance & Calibration

The Asset Maintenance & Calibration Module provides all of the required notifications for equipment maintenance and repair and keeps a detailed history for reporting purposes.

Bar Code Inventory

AssetWorks Scan & Validate system is an Internet-based solution that streamlines every aspect of the inventory process. Its comprehensive functionality automates the physical identification and reconciliation of assets, and integrates seamlessly into your asset management system.

The screenshot displays the 'Asset Detail' form in the AssetWorks software. The form is divided into several sections: 'Asset Detail', 'Accounting', 'Documents & Images', 'History', and 'Validation'. The 'Asset Detail' section contains fields for Agency, Department, Asset Number, Class Code, Intermediate, Minor, Description, Auditor's Manufacturer, Manufacturer, Model, Model Year, Serial Number/VIN, Color, Item Use, Category Code, Alternate Est. Life, Condition, Location, Building, Floor, Room, Person Responsible, and Acq Report Number. The 'Accounting' section shows a table with columns for View, Date, Type, Method, Description, Amount, and Transaction ID. The 'History' section shows a table with columns for Date, Field, New Value, Old Value, User, and History Type. The 'Validation' section is currently empty.

View	Date	Type	Method	Description	Amount	Transaction ID
	02/02/2010	Original Acquisition	1-Own Funds		\$1,500.00	4330194

Date	Field	New Value	Old Value	User	History Type
02/02/2010 03:08:59 PM	Inserted Accounting Transaction (Original Acquisition)	4330194	-	INCIRCUIT DEVELOPMENT	User Edit
02/02/2010 03:08:58 PM	New Record	447-0155202	-	INCIRCUIT DEVELOPMENT	User Edit

AssetWorks Asset Management Software allows you to view all details on one screen.

Software as a Service (SaaS)

AssetWorks provides its applications in the Software as a Service (SaaS) model, minimizing your dependence on internal IT resources. With unsurpassed security, you provide access to everyone who needs it, while maintaining complete control of the centralized database. The result is significant savings in infrastructure and licensing costs, and new levels of process efficiency and data integrity.

AssetWorks becomes your personal IT resource, focused solely on your asset management application. This means you can install an enterprise-wide system that poses no additional load on your IT staff. AssetWorks provides database administration, deployment, version control, backup administration, setup, maintenance and performance monitoring. And we guarantee your “uptime” to make sure your data is always available.

Of course, you have 100% accessibility to the data at all times, and we’ll even replicate the database to your local servers if needed. It’s a model that works, and has been field tested for ten years.

Benefits of SaaS

- **SAVINGS**
No additional hardware and software eliminates startup costs. The real cost savings comes over time when AssetWorks handles upgrades, global reach and help desk support with no downtime or shelfware waste.
- **SHORTER DEPLOYMENT TIME**
AssetWorks can provision your subscription immediately and your users get started with minimal training.
- **DATA SECURITY**
Your data is managed in an enterprise-class data center with best-of-breed intrusion protection, full disaster recovery and backup procedures.
- **INTEGRATION AND CUSTOMIZATION**
AssetWorks connects your enterprise systems with our web services API, custom developer tools and prebuilt connectors to widely-used applications.
- **EASY TO SCALE**
Multi-tenancy eliminates complexity at each service layer so that you can add users instantly when your business needs expand.
- **HIGH PERFORMANCE & AVAILABILITY**
Your data is continuously accessible on AssetWorks’ highly responsive platform and is ready to scale to accommodate your entire organization.
- **BETTER ADMINISTRATION**
AssetWorks handles upgrades and product updates without IT resources or downtime. Administrators can ensure that users access only that data for which they are authorized.

AssetWorks has been providing software and property management consulting for fifteen years. The Asset Management application was designed especially for property managers, including base functionality for every area of asset, inventory and surplus management.

Reports

AssetWorks applications include powerful, user-friendly reporting tools. Standard reports include pre-defined layouts for all common reporting needs. Using the built-in report generator, users can edit the standard reports to create new reports, or create new reports from scratch. For infrequent queries, the ad hoc generator allows users to filter the data and either print or download the results to MS Excel. AssetWorks also uses Crystal Reports to create complex and custom formatted reports such as Certification Forms or Hand Receipts.

Whether it's Standard, Ad Hoc, or Custom Formatted reports, AssetWorks allows unprecedented access to the data you need to make business decisions.

The screenshot displays the InCircuit software interface. At the top, there is a navigation menu with options: Home, Assets, Contacts, Transfers, Disposals, Live Auction, Depreciation, Users, Setup, Admin, and Reports. Below the menu, the page title is "InCircuit" and the user is logged in as "ST". The main content area shows a "Transfer" form with the following details:

- Transfer Number: 32432
- Creation Date: 02/02/2010
- From Agency: 254 - MS. STATE UNIVERSITY
- From Person: DEVELOPMENT, INCIRCUIT
- To Agency: 421 - MS. COOPERATIVE EXT. SERVICE
- Remarks: (empty)

Below the form is an "Add Assets" section with a search box and an "Add Asset" button. At the bottom, there is an "Assets" table with the following data:

View	Asset Number	Description	Approval Status	Approval Date	Recv Status	Recv Date	Receiver
Download	254-0009512	RADIO HAND HELD	Approved	02/02/2010	Received	02/02/2010	DEVELOPMENT, INCIRCUIT

At the bottom of the table, there are buttons for "Cancel", "Receive", and "Print Detail". The page number "1 - 1" is visible in the bottom right corner.

AssetWorks Asset Management Software allows you to view all details on one screen.
