

## AssetWorks Online Auction

AssetWorks Online Auction module streamlines the process of selling surplus assets to government, non-profits and the public. Expanding the traditional auction to online gives you another option for selling and means more profit for you. Online Auction is an easy-to-use component of our Surplus Management Software.

The application is completely integrated into AssetWorks Asset and Surplus Management Software. This means item descriptions and history automatically transfer to the posting, and all sales proceeds are written back to the asset records.

The software includes every feature you'd expect to find in an online auction, and additional features geared for government and other vertical applications.

AssetWorks Online Auction integrates with all other SMS modules to provide a completely integrated solution that moves surplus efficiently and profitably. All of the modules communicate to provide seamless access, minimize reentry, and maximize audit trails and transaction efficiency. The bottom line is increased profitability and effective surplus property management.

## Product Features

### ONLINE LISTING & IMAGES

Post your assets online through integration, manually or through a bulk upload - including images. Predefine special listing formats for certain categories, such as vehicles.

### FLEXIBLE SEARCHING

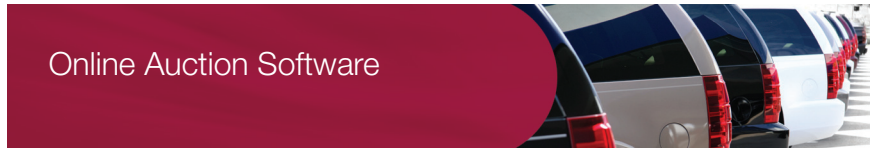

Bidders can easily find what they are seeking through the user-friendly interface including category organization and an Advanced Search function. They can also search by Region, Zip Code or Zip Code radius.

### BIDDER PROFILE MANAGEMENT

The Contacts module manages every aspect of the bidder's information online, including billing information. This function also allows different access levels for bidders, making it possible for you to run a closed or private auction.

### CUSTOMIZABLE BID-TYPE

Customize bid types on each particular asset. Define bid types on the asset level as standard, dutch, fixed price, reserve price and more. You can also set a minimum bid to protect yourself from losses.

## Optional Surplus Management Modules

Integrated Data Management For Maximum Workflow Efficiency

### Warehouse Management

AssetWorks Warehouse Management application is built to accommodate the special needs of surplus property. Whether you're tracking one small facility or multiple distribution centers, our scalable solution improves inventory accuracy and minimizes processing times. From the surplus transfer, to online receiving and tracking, through any of our optional disposition methods, our functionality caters to the unique requirements of the Surplus Warehouse.

### Federal Surplus

The optional Federal Surplus Module automates and tracks all aspects of the GSA Federal Surplus program. Transfers, Warehouse, Donations, Utilization & Compliance, Account Management and Comprehensive Reporting combine seamlessly to allow you to maximize your returns with user-friendly workflow automation.

- Integrated Form 123 processing
- GSA lot transfer, receiving and donation tracking
- Comprehensive utilization and compliance tracking
- Inspection notifications and tracking
- Automated email notification for continued use and other required documentation
- Detailed eligibility and Contact Management functionality
- Standard and custom invoice forms
- Over/Short, Federal Form 3040, Compliance, Ad hoc, User-defined and Standard reports

### Transfer Management

AssetWorks Transfer Management Module automates property transfers with easy-to-use, online forms. Email notification, customizable layout, optional approval routing and detailed audit trails maximize efficiency and eliminate delays in transfer processing.

- Incorporate existing policy and procedures using completely customizable business rules and transfer forms.
- Enforce accountability with complete audit trails and transaction history.
- Minimize delay and discrepancies with automated timers and system-generated email reminders.
