AssetWorks Surplus Management Software will optimize your processes, enabling you to get the most from your resources and track information like never before.

Use the software to:

- Improve throughput
- Eliminate lost items
- Ensure regulatory compliance
- Increase productivity
- Improve scheduling
- Enable informed decisions
- Maximize profitability

## Product Highlights

### UNLIMITED USER-DEFINED FIELDS

Eases the learning curve by using your terms with an unlimited number of fields.

### WIRELESS SCANNERS

Allow fast, error-free processing of receipts, sales and inventory.

### AUTO-TAGGING

Prints bar code tags for all inventory items as they are received.

### AUTO-TRANSFER MANAGEMENT

Allows the agencies you support to log into the system and submit surplus transfers online.

### FLEXIBLE LOCATION TRACKING

Is completely customizable, incorporating your existing model right into the software.

### BUILT-IN SEARCH UTILITIES

Provides easy access to find records and create reports.

### NO-NONSENSE APPROACH

Means you'll have a user-friendly system that's powerful enough to meet your toughest demands effectively.

## Surplus Management Modules

Integrated Data Management For Maximum Workflow Efficiency

### Warehouse Management

AssetWorks Warehouse Management module is built to accommodate the special needs of surplus departments. Whether you're tracking one small facility or multiple distribution centers, our scalable solution improves inventory accuracy and minimizes processing times. From the surplus transfer, to online receiving and tracking, through any of our optional disposal methods, our functionality caters to your unique requirements.

### Federal Surplus

The Federal Surplus module automates and tracks all aspects of the GSA Federal Surplus program. Transfers, Warehouse, Donations, Utilization & Compliance, Account Management and Comprehensive Reporting combine seamlessly to allow you to maximize your returns with userfriendly workflow automation.

- Integrated Form 123 processing
- GSA lot transfer, receiving and donation tracking
- Comprehensive utilization and compliance tracking
- Inspection notifications and tracking
- Automated email notification for continued use and other required documentation
- Detailed eligibility and Contact Management functionality
- Standard and custom invoice forms
- Over/Short, Federal Form 3040, Compliance, Ad hoc, User-defined and Standard reports

### Transfer Management

AssetWorks Transfer Management module automates property transfers with easy-to-use, online forms. Email notification, customizable layout, optional approval routing and detailed audit trails maximize efficiency and eliminate delays in transfer processing.

- Incorporate existing policy and procedures using completely customizable business rules and transfer forms.
- Enforce accountability with complete audit trails and transaction history.
- Minimize delays and discrepancies with automated timers and system-generated email reminders.

The screenshot shows the InCircuit software interface. At the top, there is a navigation menu with options: Home, Assets, Contacts, Transfers, Disposals, Approvals, Users, Setup, Admin, Reports. Below this, there are tabs for 'Transfer' and 'Surplus'. The main content area displays 'Successfully received assets.' and a 'Transfer Detail' form. The form fields include: Transfer Number (10001), Creation Date (02/03/2010), From Custody Code (0132 - BURSAR'S OFFICE), From Person (DEVELOPMENT, INCIRCUIT), To Custody Code (1372 - OLR-LEARNING RESOURCES CENTER), Method (Inter Departmental), Remarks, Begin Date (02/03/2010), and End Date (02/17/2010). Below the form is an 'Add Assets' section with a search bar for 'UCID Number' and an 'Add Asset' button. At the bottom, there is a table of assets:

View	UCID Number	Description	Approval Status	Approval Date	Status	Recv Date
	106000001	Computer	Approved	02/03/2010	Received	02/03/2010
	106000002	HP Printer	Approved	02/03/2010	Received	02/03/2010

Below the table are buttons for 'Download', 'Cancel', 'Receive', and 'Print Detail'. The page number '1 - 2' is visible at the bottom right of the interface.

AssetWorks Surplus Management Software allows you to create, approve and receive transfers all in the system.

## Counter Sales

Whether you're donating to pre-qualified buyers or selling to the general public, Counter Sales automates the process in a user-friendly, time-saving format. Complete integration with the warehouse and other disposal modules allows seamless communication, eliminating errors and minimizing administration. Integrate retail functionality into the warehouse to boost productivity, maximize customer satisfaction and increase profits.

- Set up your sales as retail or restricted to only eligible buyers.
- Provide maximum customer convenience with wait lists, on-hold orders, bar code shopping and more.
- Save time with automated customer registration and verification.
- Personalize the checkout process with custom bill of sale, invoicing and checkout options.

## Live Auction

The Live Auction module is comprehensive software to conduct and report on traditional onsite auctions. The application is completely integrated into SMS, and includes field-proven functionality for every aspect of preparing, conducting and closing property auctions.

- Scanner-based lotting saves tons of time.
- Live checkout and invoice functionality.
- Customizable invoicing forms mean you can use your existing requirements.
- Auction reports include running totals, auction sales, checkout, payment and item pickup.
- The software simplifies closing the auction by reconciling all sales and posting the appropriate disposal information to every asset sold.

## Online Auction

AssetWorks Online Auction module streamlines the process of selling surplus assets in a familiar, easy-to-use format. Online Auction makes it easy to move your auctions online while producing more profit for your organization.

- Bidder profile management maintains every aspect of the bidder's information.
- Customizable bid types allow you to define the bid type at the asset level.
- Online payment allows bidders to pay through an automated system.
- Item history is available on all transactions.
- Sales information posts back to the item record.

*AssetWorks Online Auction Software features the same functionality as eBay to make selling surplus easy.*

Through a combination of subject matter expertise, product flexibility, hands-on implementation and continued service, AssetWorks ensures our software solutions meet your unique business needs now, and into the future.

## Web Surplus

There's no better way to handle surplus than putting it back to work for the public. AssetWorks Web Surplus module does just that by publishing the contents of the surplus warehouse in a web storefront. State agencies, municipalities, schools and other eligible entities use this tool to give new life to property that would otherwise be sold for pennies on the dollar.

Web Surplus is completely integrated into AssetWorks Surplus and Asset Management applications, so items are published automatically, often being re-allocated before they even hit the warehouse. This equates to money and time saved by not handling or storing reutilized property. With automated wait list functionality, registered users place orders for property before it's sent to the surplus warehouse.

## Configuration

AssetWorks SMS allows you to define your own inventory layout to track every detail of your surplus property. The software includes dedicated record types for Federal, Vehicle, Equipment and Assets, so you have the option of managing Federal Property separately or as a completely integrated component of a central state surplus warehouse.

Our standard forms are completely configurable, and allow you to incorporate your existing management model right into the software. Unlimited user-defined fields and built-in quick-search utilities provide easy access to manage records on your terms. Our no-nonsense approach to surplus management means you'll have a user-friendly system, powerful enough to meet your toughest demands, but simple enough for your warehouse personnel to use effectively.

## Data Conversion

We offer standard import services with every installation to convert your existing inventory, donee or account history and other applicable records.

## Software as a Service (SaaS)

AssetWorks hosts our solutions online, working closely with you on configuration and setup, and providing all server hardware and database administration. All you need is a connection to the Internet and you are up and running. We become your technology partner, providing prompt and reliable service with a standing money back guarantee. You get enterprise class software with no additional load on your IT department for deployment, system administration, backups or support.
