

Operations and Maintenance

Your Challenges

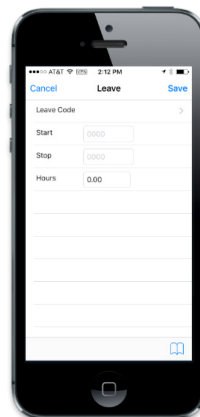

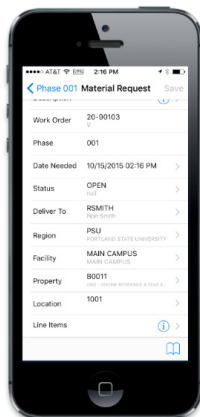

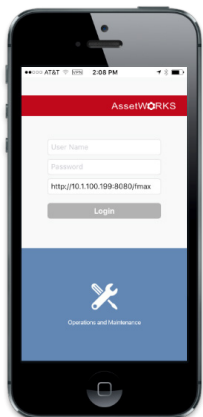

- Field technicians are spending less time in the field where they do the most good
- Arcane paper processes waste time and adversely affect productivity and hurt the bottom line
- Your workforce is spread out over a large, geographically-dispersed area

What's in it for you?

- Secure access to AiM via Wi-Fi or carrier network using AiM credentials
- Support for Apple iPhone, iPod Touch and iPad
- Application deployment via Apple's iTunes™ App Store

Access to Key AiM Functionality

- Field personnel can access iDesk on any iOS device from virtually anywhere, providing always-on, anywhere/anytime access to key AiM functionality
- Perform Work Management tasks, including Daily Assignments, Work Queue and Work Orders
- Perform Inventory Management tasks, including Physical Counts and Counter Releases

FiRE O&M compliments and extends the back office work management capabilities of AiM by providing tradespeople with the precise functionality they need in the field.

The FiRE platform is a suite of purpose-driven mobile applications designed with specific organizational roles in mind. Leveraging the latest Apple iOS software capabilities, FiRE keeps your mobile workforce more agile, more flexible and better informed.
