TIME MANAGEMENT PORTAL

Modern Labor Intelligence
for Asset Management

For any city, county, or public works organization to operate efficiently, accurate labor tracking is essential. Many rely on outdated systems that create delayed visibility, disconnected workflows, and manual approvals. AssetWorks EAM's Time Management Portal replaces legacy timesheets with a modern, web-based solution that posts labor directly to work orders in real time — providing clear insight into asset and project costs.

Key Features:

- Real-time labor posting – Hours are entered and immediately applied to work orders for accurate cost tracking
- Responsive web interface – Mobile-friendly time entry for technicians and intuitive dashboards for supervisors
- Configurable approval workflows – Streamlined approvals with audit trails to support compliance
- Centralized time and leave management – Track work hours, stipends, and leave requests in one portal
- Administrative controls – User management and configuration tools to support organizational needs

❓ Do you need real-time visibility into labor costs across assets and projects?

❓ Is your team struggling with slow approvals or manual payroll processes?

❓ Would your field staff benefit from a mobile-friendly, easy-to-use time entry system?
