

## Challenges

Technicians lining up to enter information into a solitary computer on the shop floor. Fleet managers struggling to justify an increased budget. Analysts spending weeks calculating lifecycle costs.

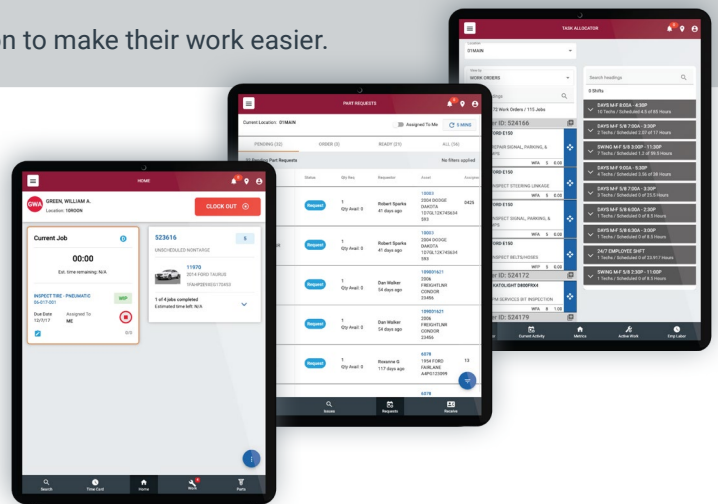

For many organizations, vehicle equipment assets and the labor needed to maintain them represent significant costs, frustrating data sources, and complex, time-consuming analyses.

Fleets across the public and private sectors deserve a solution to make their work easier.

## Solution Overview

**AssetWorks FleetFocus** is a web-based fleet and equipment management solution capable of tracking unlimited assets, users, and locations.

FleetFocus was designed by fleet managers for fleet managers with robust features and an easy-to-use interface. The system tracks all functions related to the maintenance of vehicle equipment, including repair and preventive maintenance (PM), work orders, operating expenses including fuel, oil, electricity, and licensing, and billing for equipment usage.

## Key Features

- **Asset Management** – Preventive maintenance schedules, components, and notifications
- **Work Order Management** – Tracking, commercial work, billing, historical costs, shop calendar, recalls/campaigns, warranty tracking, collision tracking, and barcode functionality
- **Technician Work Management** – Assignments, completion, and timecards
- **Inventory Management** – Part records, requests, issues, replenishments, inventory counts, and cores
- **Reporting and Analytics** – 200+ out-of-the-box reports, ad-hoc reports, and dashboard KPIs
- **Mobile**
- **Integrations/APIs**

## Benefits

### Save Money

Avoid unnecessary ownership costs through optimized maintenance scheduling, labor tracking, and parts & inventory management

### Keep vehicles longer

Extend useful life of your vehicles by keeping up with effective maintenance schedules and documentation

### Understand your data

From historical maintenance data to vehicle location, FleetFocus allows you to see the complete picture of your fleet operations

### Break down data silos

Integrate all of your vital systems, including fuel, EV charging, GPS/telematics, and motor pool, through APIs
