

Challenges

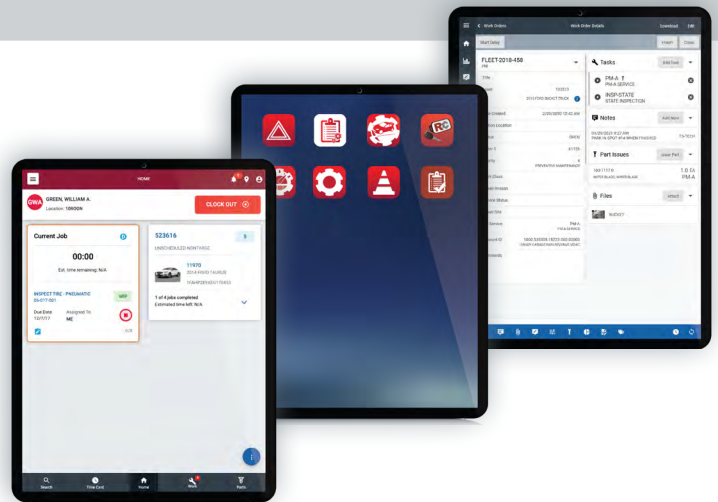

Technicians waiting in line to enter maintenance information into a shared workstation. Fleet managers unable to easily view work away from their desk. Inventory counts are completed via paper forms or spreadsheets.

Solution Overview

The **AssetWorks MobileFocus Enterprise** suite is a collection of mobile and responsive products designed to mobilize and modernize your fleet operations. The suite provides better data in less time to aid in making decisions that have long-term benefits for the fleet—no matter where or how work is completed.

Key Features

- **FleetFocus EDGE** – Fully responsive interface for technicians, supervisors, and parts managers
- **SmartApps** – Suite of connected mobile applications
- **Fleet Connect** – Disconnected mobile application

Benefits

Work anywhere

Bring the power of FleetFocus with you wherever you are working—on the shop floor, on the road, and everywhere in between

Increase security

No more lost forms or separate systems of record for increased security

Save time

Keep your operations moving at the speed of fleet, without waiting in line, transcribing handwritten forms, or housing data in separate systems

Attract and retain top talent

Delight your employees with modern technology for streamlined operations
