

NAPA-IBS HUB

Integration with FleetFocus

Are you looking for maximum efficiency and inventory cost savings within your fleet management parts operation? **In FleetFocus, you can integrate seamlessly with NAPA IBS HUB** to service, update and invoice your parts needs. Not sure how it works? Check out these helpful flow charts:

Part Requests

Part Request service will be used when requesting parts through FleetFocus, sending pertinent part data to the new IBS HUB.

- 
1. FleetFocus user creates a part request.
 2. Part request details sent to NAPA.
 3. NAPA processes part request.

Part Synchronization & Updates

Ensures that parts exist at the FleetFocus part primary and part location levels, updates the quantity on hand, unit price, unit of measure, description, part commodity, hazardous part identifier, manufacturer, primary vendor and stock status.

- 
1. NAPA sends part information.
 2. Update FleetFocus part record(s).
 3. Success or failure sent to NAPA.

Part Invoice/Issue

NAPA sends an invoice to FleetFocus which is then processed as a part issue in FleetFocus.

- 
1. NAPA sends part invoice.
 2. Update FleetFocus part record(s).
 3. Success or failure sent to NAPA.
