

Partnering with **NAPA Integrated Business Solutions** gives you access to exclusive and unparalleled technological advantages that come from seamlessly integrating our IBS HUB inventory and order management system with your existing AssetWorks fleet management software. A few of the many impactful benefits of this technology integration that will help your shop run more efficiently include:

- Easier Part Ordering
- Increased Mechanic Wrench Time
- Quicker & More Accurate Invoicing
- Reduction in Human Error
- Faster Fill Rates
- Increased Inventory Turnover
- Minimized Equipment Downtime

### Are You Ready To Integrate?

- Do you have the required version of AssetWorks software or later?
- Do you have an established internet connection?
- Do you have access to communicate through the necessary firewalls?
- Have you identified your project team (Fleet, IT, Administration)?
- Do you have a Project Scope (Timeline, Budget, Resources)?
- Is IBS HUB already live in your parts room?

**For more information, contact your AssetWorks Sales Representative or visit us online at [assetworks.com](https://assetworks.com).**

### Next Steps

Once you are ready to integrate:

- 1.** Request an integration package for IBS HUB from your AssetWorks representative.
- 2.** Contact your IBS representative to facilitate the integration on the NAPA side.
- 3.** Provide Project Scope and Team to NAPA.\*

*\* Please allow a minimum of six weeks, depending on project scope and current project queue, for full integration implementation to be completed.*

### System Technical Requirements

- AssetWorks FA version 17.0.12 OR version 18.0.3 or later (for FA users only)\*\*
- AssetWorks M5 version 17.0.11 OR version 18.0.5 or later (for M5 users only)\*\*
- Bi-Directional Network Connectivity (Internet Connection & Firewall Compatibility Established)

*\*\* For earlier versions, contact your NAPA IBS Division IBS Manager for options.  
\*\* Utilizing Part Request workflow is highly recommended.*
