# COMMERCIAL FUEL ENTRY SMARTAPP

Accurately Monitor Fueling Outside Your Network

The Commercial Fuel Entry SmartApp is essential for facilitating seamless commercial fuel tracking. With this SmartApp fleets do not need to deal with the challenges of refueling outside of their designated network. With the Commercial Fuel Entry Smart App drivers can effortlessly input fuel transactions directly from their mobile device while stationed at the pump, eliminating the need for paperwork and enabling real-time recording. Whether involving gas, diesel, or electricity, the Commercial Fuel Entry SmartApp offers a platform to monitor every transaction occurring at an external pump or station, ensuring accurate departmental billing and cost allocation.

Commercial Fuel Entry SmartApp is included as part of the MobileFocus Enterprise suite.

Key Features:
- **Real-time transaction recording –** Seamless connectivity to receive fueling notifications from outside of their network
- **Available on any iOS device**
- **Integrated with FleetFocus –** All data is automatically integrated with FleetFocus

Are you effectively monitoring your fueling activities beyond your network boundaries?
