

# DASHBOARD SMARTAPP

Gain Real-time Insight  
into Operations

The **Dashboard SmartApp** allows fleets to access configured dashboards in AssetWorks FleetFocus from the mobile device. From real-time monitoring to historical trend analysis, the Dashboard SmartApp offers insights to drive efficiency and enhance productivity. Whether it's tracking vehicle performance, analyzing fuel consumption, or monitoring maintenance schedules, the app provides instant access to key metrics and performance indicators. With the Dashboard SmartApp, fleets can visualize data with clarity and precision, empowering them to streamline operations, reduce costs, and maximize performance.

The Dashboard SmartApp is included as part of the MobileFocus Enterprise suite.

Key Features:

- **Real-time accessibility** – Access dashboards from a mobile device
- **Accessible on any internet-connected device**
- **User-friendly interface** – Navigation and data interpretation understandable for all users
- **Integrated with FleetFocus** – All data is automatically integrated with FleetFocus

❓ Does your fleet have all the necessary tools to gain real-time insight, track performance metrics, and optimize operations effectively?
