

# INSPECTION CHECKLIST SMARTAPP

## Streamlining Inspections for Enhanced Efficiency and Compliance

The **Inspection Checklist SmartApp** is designed to simplify the inspection processes across various industries. With the Inspection Checklist application, there is no longer a need for cumbersome paper forms as the app streamlines the process, boosting efficiency and reducing administrative burdens. Built to comply with DOT regulations, the application guarantees adherence to regulatory standards effortlessly. With its seamless integration, defects identified during inspections trigger automatic service requests in FleetFocus, ensuring prompt resolution. Through this integration, having comprehensive access to historical data will provide valuable insights into vehicle maintenance trends and optimize fleet management practices for peak performance.

The Inspection Checklist SmartApp is included as part of the MobileFocus Enterprise suite.

### Key Features:

- **Historical data access** – past inspection records and meter readings
- **Accessible on any internet-connected device**
- **Regulatory compliance** – compliant with DOT regulations
- **Integrated with FleetFocus** – All data is automatically integrated with FleetFocus

Are you still using paper forms for inspections? Discover how our Inspection Checklist SmartApp can streamline your inspection process!
