

MYVEHICLE SMARTAPP

The On-the-Go Fleet Management Companion for Enhanced Efficiency

The **MyVehicle SmartApp** is an all-in-one solution for staying connected with your fleet management operations while on the move. Seamlessly integrated with FleetFocus, the MyVehicle SmartApp puts the power of fleet management directly into the hands of operators. With this SmartApp, users gain instant access to vital information about their associated vehicles, enabling them to enter or update meter readings, create service requests on the fly, and stay ahead of maintenance schedules. Additionally, the MyVehicle SmartApp provides access to a directory of preferred vendors and allows users to review detailed work order history, providing operators with the tools to make informed decisions and streamline fleet management processes while on the road.

The MyVehicle SmartApp is included as part of the MobileFocus Enterprise suite.

Key Features:

- **Meter readings** – easily inputted for accurate vehicle usage tracking
- **Accessible on any internet-connected device**
- **Preferred vendor directly** – streamline procurement processes
- **Integrated with FleetFocus** – All data is automatically integrated with FleetFocus

Could your operators benefit from having continuous access to vital vehicle information and maintenance tracking capabilities while on the go?
