

# RESERVATION CENTER SMARTAPP

## Revolutionize Motor Pool Reservations with Smartphone Booking

**The Reservation Center SmartApp** simplifies the process of reserving fleet vehicles on a short-term basis, offering users a convenient solution for making reservations directly from their smartphones. The app allows users to schedule pick-up and drop-off times within the intuitive interface. Eliminating the need for accessing FleetFocus or other motor pool portals on computers ensures employees can quickly and securely reserve vehicles without unnecessary administrative hurdles. Whether for occasional users or everyday FleetFocus users, the Reservation Center application offers the flexibility to manage reservations from anywhere, reducing dependency on desktop access and enhancing overall efficiency in motor pool management.

The Reservation Center SmartApp is included as part of the MobileFocus Enterprise suite.

### Key Features:

- **Remote reservation scheduling** – motor pool management from anywhere
- **Automated reservation conversions**
- **Accessible on any internet-connected device**
- **Flexible scheduling** – pick-up and drop-off times within the app

Efficient management of FleetFocus motor pool reservations directly from your smartphone, eliminating the need for desktop access and enhancing convenience for all users.
