

HOW TO STOP YOUR FLEET FROM RUNNING YOU

IS YOUR FLEET RUNNING YOU?

If it feels like you're constantly putting out fires, you're not alone.

- Breakdowns are disrupting your operations
- Fuel and maintenance costs keep climbing
- You're relying on spreadsheets or disconnected systems
- Getting accurate, real-time data feels impossible

When you're always reacting, your fleet is in control, not you.

WHAT'S CAUSING THE CHAOS?

Most fleet challenges come down to a few core issues:

Disconnected Data

Critical information is spread across multiple systems, making it hard to get a clear picture of what's happening.

Reactive Maintenance

Without automated scheduling and tracking, maintenance happens too late—leading to costly downtime.

Limited Visibility

You can't manage what you can't see. Without real-time insights, small issues turn into big problems fast.

HOW TO TAKE BACK CONTROL

Leading fleets don't work harder. They work smarter.

Centralize Your Operations

Bring assets, maintenance, and fuel data into one system for a single source of truth.

Automate Preventive Maintenance

Stay ahead of issues with scheduled service and alerts that reduce unexpected breakdowns.

Track What Matters

Monitor utilization, cost per mile, downtime, and asset performance to make better decisions.

WHAT CONTROL LOOKS LIKE

When your fleet is running efficiently, you can:

- ! Reduce fuel costs by up to 15%
- ! Minimize downtime and extend asset life
- ! Eliminate manual errors and duplicate work
- ! Make faster, data-driven decisions

TAKE CONTROL WITH FLEETFOCUS

FleetFocus gives you the tools to manage your fleet with confidence.

- ✓ A single platform for assets, maintenance, and fuel
- ✓ Real-time visibility into fleet performance
- ✓ Automated workflows and reporting
- ✓ Scalable solutions that grow with you
