

THE IMPORTANCE OF FLEET MANAGEMENT NOTIFICATIONS

Are you feeling overwhelmed while managing your fleet at work? With so many hours, meetings and details in every week, how can you remember every important piece of information for your fleet organization? Looking at the breakdown below, it's no wonder that your brain is feeling stressed.

Let FleetFocus's notifications do the remembering for you!

The average person has nearly **12,000 THOUGHTS** Per Day!

1 WEEK = 168 HOURS

1 WEEK X 52 = 1 YEAR, 8,760 HOURS

Although we have the potential to remember everything we learn, we may not be able to recall all of it because:

- Old memories interfere with new memories
- Our brains focus on the bigger details, not minute details
